

For those hoping for tomatoes, I have spied the first blossoms. Unfortunately, it will be at least a month prior to picking. This week in the garden, we have the following for picking:

East Garden

3rd Bed from the church: Beets (I spied 1 1/2" beets this morning plus the greens are ready to eat also. Beet greens are used like spinach, kale, or Swiss chard.)

South Garden

Trellises at the Ends of Beds 4, 6, 8, 10, 12, and 14: Sugar Snap Peas (This is the peas last week. Don't miss these raw cuties

Beds 16 and 17: Kale.

Bed 18: Swiss Chard
